## PROFESSIONAL SUMMARY

Full Stack Developer (MERN) and final-year B.Tech student at IIIT Bhagalpur, with hands-on experience building production-grade web applications. Proficient in React.js, Node.js, Express.js, MongoDB, REST APIs, and JWT-based authentication. Ranked in top competitive programmers with 650+ DSA problems solved across LeetCode and CodeChef. Seeking a software engineering role to design and build scalable, high-performance systems.

## EDUCATION

- |                                                                |                   |
|----------------------------------------------------------------|-------------------|
| • <b>Indian Institute of Information Technology, Bhagalpur</b> | 2022 – 2026       |
| <i>B.Tech in Mechatronics and Automation Engineering</i>       |                   |
| • <b>R Krishna Saraswati Inter College, Kanpur</b>             | 2021              |
| <i>Class XII – UP Board, Uttar Pradesh</i>                     |                   |
|                                                                | Percentage: 76.8% |
| • <b>R Krishna Saraswati Inter College, Kanpur</b>             | 2019              |
| <i>Class X – UP Board, Uttar Pradesh</i>                       |                   |
|                                                                | Percentage: 82.8% |

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, Python, C++, C, HTML, CSS  
**Frontend:** React.js, Tailwind CSS, Responsive UI Design  
**Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control (RBAC), Redis, Caching  
**Databases:** MongoDB, PostgreSQL, Firebase  
**Cloud & DevOps:** AWS, Docker, Git, GitHub, Vercel, Render  
**Developer Tools:** VS Code, Jupyter Notebook  
**Core CS Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Operating Systems, Computer Networks, Database Management Systems (DBMS)  
**Areas of Interest:** Full Stack Web Development (MERN/MEAN), Machine Learning

## PROJECTS & EXPERIENCE

- |                                                                                                                                                                                                |              |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| • <b>QuickStay</b>   React.js, Node.js, MongoDB, Clerk Auth, Tailwind CSS<br><a href="#">GitHub</a> / <a href="#">Live</a>                                                                     | June 2025    |
| – Architected and deployed <b>QuickStay</b> , a full-stack hotel booking platform supporting real-time room search, dynamic filtering, and secure reservations for <b>500+ listings</b> .      |              |
| – Optimized frontend-backend communication using <b>React.js</b> , <b>Node.js</b> , and <b>MongoDB</b> , reducing API response time by <b>35%</b> through indexing and query optimization.     |              |
| – Engineered adaptive pricing engine and intelligent room filters, cutting irrelevant search results by <b>50%</b> and improving booking conversion accuracy by <b>25%</b> .                   |              |
| • <b>DevTinder</b>   React.js, Node.js, Express.js, MongoDB, Socket.io, Tailwind CSS<br><a href="#">GitHub</a> / <a href="#">Live</a>                                                          | January 2025 |
| – Built <b>DevTinder</b> , a developer networking platform with skill-based matching, enabling <b>200+ developers</b> to connect for project collaboration.                                    |              |
| – Implemented <b>JWT-based authentication</b> and encrypted cloud storage, reducing unauthorized access by <b>80%</b> and scaling the platform to handle <b>50% higher</b> concurrent traffic. |              |
| – Developed <b>real-time chat</b> using WebSocket/Socket.io and a skill-graph based recommendation engine, boosting user session engagement by <b>40%</b> .                                    |              |
| • <b>MyMart</b>   React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS<br><a href="#">GitHub</a> / <a href="#">Live</a>                                                                   | August 2025  |
| – Designed and shipped <b>MyMart</b> , a full-stack e-commerce application with product browsing, cart management, category search, price/brand filtering, and secure checkout.                |              |
| – Engineered <b>JWT-based authentication</b> with role-based access control (RBAC) and protected REST APIs, eliminating unauthorized API access and securing all data endpoints.               |              |
| – Optimized backend APIs and built a responsive UI with <b>Tailwind CSS</b> , reducing page load time by <b>30%</b> and improving checkout flow efficiency by <b>20%</b> .                     |              |

## CERTIFICATIONS

- |                                                                                                     |                                  |
|-----------------------------------------------------------------------------------------------------|----------------------------------|
| • <b>The Complete Web Development Bootcamp</b> – Udemy, Angela Yu (2025)                            | <a href="#">View Certificate</a> |
| • <b>Machine Learning Specialization (Regression, Neural Networks)</b> – Coursera, Andrew Ng (2025) | <a href="#">View Certificate</a> |
| • <b>AWS Cloud Practitioner Essentials</b> – AWS Training & Certification (2026)                    | <a href="#">View Certificate</a> |

## ACHIEVEMENTS

- |                                                                                                                                                                                                                    |                                  |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|
| • <b>Smart India Hackathon 2024</b> – Selected in the inter-college round out of 200+ teams, presented an AI-based solution to a real-world government problem statement.                                          | <a href="#">View Certificate</a> |
| • <b>Competitive Programming</b> – Solved <b>600+ DSA problems</b> across LeetCode, CodeChef, and Codeforces, maintained a <b>400+ days</b> continuous streak on CodeChef and <b>130+ days</b> streak on LeetCode. |                                  |
| • <b>Carrom Champion</b> – Secured <b>1st position</b> in the Team Carrom event at Udyatva Inter-College Sports Fest 2025.                                                                                         |                                  |
